

About me

I am a highly motivated software developer with a business orientation and a strong background in complex systems. Currently, I am pursuing a degree in System Engineering, which has further enhanced my technical skills and knowledge. I am always looking for new challenges and opportunities to learn and grow as a developer and as a future professional.

Education

Universidad Tecnologica Nacional
Degree in System Engineering.

Rosario, Santa Fe
Started: Mar 2019 | Expected graduation: Dec 2024

Skills

Database Technologies MySQL, MongoDB

Web Development Frameworks .NET Framework 4.7, React & Next js, REST API Development with Express, Tailwind CSS

Version control systems Github, Git

Soft skills Algorithm Implementation, Organization and Time Management., High level of attention to detail., Teamwork

Projects

Website for Iron Giant Games JavaScript, React, HTML & CSS, Web3

<https://github.com/Iron-Giant-Games/website>

"I worked on a project to develop a landing page for a group called Iron Giant Games. My role included designing and coding the page using HTML, CSS, and React. This project allowed me to improve my web development skills and work on a cross-functional team."

Real Time Chat Express, MongoDB & Mongoose, JavaScript & Next js, Tailwind CSS

<https://github.com/soundOfff/tp-backend>

"A real-time chat application that allows a user to add other registered users and send them messages without being added by them, differentiating them from each other. In this project I was able to practice backend development, something I had never done before, as well as working with a non-relational database."

Self-management system of subjects .NET Framework 4.7, C#, HTML & CSS, JavaScript

<https://github.com/soundOfff/tp2Grupo6Academia>

"Self-management system of subjects with different roles that allows, for example, the student to register for an exam or the teacher to upload the grade of an exam for which a student is registered. In addition to a superuser that allows the creation or modification of users."

Courses

FutureLearn Construct a Virtual Reality Experience (May 2021).

FreeCodeCamp Complete JavaScript development Bootcamp (Feb 2021).

Harvard CS50's Web programming with Python and JavaScript (Mar 2020).

FreeCodeCamp FreeCodeCamp Node JS and Express JS - Backend development (Mar 2022).
